

For the creation of scalable backend-systems that provides millions of users with content we are looking for a

Backend Developer

Pixeltrend: This is us!

We have changed from a startup to a successful company in the app-entertainment business. What hasn't change is our independent collaborative way of working and startup atmosphere. Our broad app portfolio puts a smile on thousands of faces every single day.

How do we work?

NO deadlines - NO pressure from customers! @Pixeltrend we bring our own ideas to life and create our apps in a relaxed and stress-free environment. Our office is located in the startup centre 'Neue Werft' which provides an exciting work-environment for you to thrive.

Be a part of us!

Be part of the development of our apps - from the concept to the release. In our development-team you will get plenty of opportunities to shape our future apps with your own ideas!

Your mission:

- Building efficient and scalable backend-systems
- Creating and running tests
- Monitoring and maintaining existing code
- Working with the latest cloud technologies

Your skills:

- Ability to write clean and structured code
- Knowledge of REST APIs
- good English skills

Salary:

The least we can do for you is 40,000.- € / year. Your actual offer depends on your skill set and experience.

**You are interested in being part of our team?
Then send us your detailed application!**
